Nvidia or Amd

If you want to buy a new graphiccard then you need firstly to know for what you want use it and how much you want to spend.

Nvidia has much more funktions but if you're low on money and want the best for your money then i say Amd is better.

By the high-end class theres Nvidia the winner (if you don't care of money)

Amd is slightly better in gaming but Nvidia is better in multitasking.

So as a gamer you should buy a Amd gpu but for videoediting or streaming i would say Nvidia gpu is better.

Thank you for reading.
